SUPINE TO PRONE IN ONE MOTION
The Zing line of multi and single position standers were designed to fit the widest range of children and accommodate positioning challenges few others can. The Zing line features independent leg abduction up to 30 degrees on each model. The units can be configured simply, with padded strapping system to ease transfers and aid multi-user environments. But when required, individual positioning and support components can be added.

**True Multi-Position Stander**
- The MPS base allows three positions without changing pads, flipping foot plates or moving the tray.
- Provides a smooth transition from a flat-to-load transfer to supine, vertical and 20 degrees prone.
- Frame will only go supine and upright with Prone Position Lockout engaged.

**True Hip Pivot Leg Abduction**
- Pivots at the hips for proper leg alignment in hips, knees and feet.
- Feet maintain angle with the rest of the legs – no wedges needed.
- Up to 30 degrees of abduction per leg.
- Promotes musculoskeletal development for infants, toddlers and kids.

**Plenty of Growth**
- Size 1 fits children from infancy to 44”.
- Can easily grow with the child and adapt to their changing needs.
- 70 pound weight capacity.

**Multi-Use Tray**
- The MPS, Supine, MPS TT and Supine TT feature a multi-use tray that is angle adjustable and swings away.
- Tray can remain attached during transfers.
- More activities are possible by swinging tray away during standing therapy.

**Accommodating Contractures**
- No special modifications are needed to accommodate children with contractures.
- Using the multi-adjustable foot plates, multi-adjustable lower pads, and the independent calf pads, it is possible to adjust for contractures in one or both sides.

**Hygienic Covers**
- Available for the pelvic, upper body, lateral, head and tray areas.
- Easy to wash.
- Especially beneficial if stander is used during feeding.
- Keeps stander from getting soiled.

**Unique Lift Mechanisms**
- Dual controls are available allowing angle adjustment by foot pedal or hand control.
- Gas Spring Lockout prevents an inadvertent change of position, especially important when around other children.

**Remarkably Modular**
- Can be configured as a simple stander or fit a child with the most complex needs.
- Designed to grow with the child – options can be added as needed.
- Great for a multi-user facility or school.
**Health Benefits**

- Improvement/maintenance of range of motion
- Decrease/joint/muscle contractures
- Management of atrophy in the trunk and leg muscles
- Improvement of strength to trunk and lower extremities
- Decrease muscle spasm
- Promote proper muscle, skeleton development
- Improve/maintain bone integrity/skeletal development
- Lessen/manage the progression of scoliosis
- Manage pressure ulcers through changing positions
- Improve bowel function and regularity
- Aid in kidney and bladder functions
- Strengthen cardiovascular system and build endurance
- Improve circulation
- Reduce swelling in lower extremities.

**Foot Plate Height (A):** Measure the distance from the hip of the user to the bottom of the foot.

**Knee Pad Height (B):** Measure the distance from the hip of the user to the center of the knee.

**Centering the Hip (C):** The user's hip should be centered in line with the pivot point of the stander ensuring proper hip alignment when using abduction, adjust support components up or down based hip position.

---

The Zing MPS is the only multi-position stander that can seamlessly transition from supine to prone without having to transfer the child out and reposition foot plates, pads or trays.

The Zing Supine features a comfortable 32" transfer height and provides all the positioning and support features of the MPS.

The Zing MPS TT is identical to the MPS from a positioning standpoint, but features larger, wider support pads and options for padded strapping, that can simplify transferring and securing children.

The Zing Supine TT features the larger pads and padded strapping options of the MPS TT and positioning from flat to load supine to vertical.

The Zing Vertical is a single position stander that features a Padded Quick Strap to ease upright transfers. It's also one of the only vertical standers to offer anatomically correct independent leg abduction.

The Zing Prone is a single position stander but is one of the few to offer a flat-to-load transfer position at a comfortable height of 32".
